

FUEL POWDER

RUK **FUEL**
STRATEGICALLY
ENGINEERED

Clean Boost FUEL POWDER is a quick and cost-effective way to improve fuel economy and extend the useful life of engine components. Clean Boost FUEL POWDER has been tested extensively by independent labs. It has been shown to reduce carbon particulate emissions and improve fuel combustion. Clean Boost FUEL POWDER provides real, measurable savings. Each 100% recyclable tube of Clean Boost FUEL POWDER contains enough to treat 5-7 gallons of fuel. Remove cap, dump contents and start to see a difference right away!

1. Removes Deposits
2. Decreases Fuel Consumption
3. Reduces Emissions
4. Lower Exhaust Temperatures
5. Extends Engine Oil Life
6. Extends Equipment Life
7. Decreases Octane Requirements

PRODUCT USAGE:

FUEL POWDER is formulated for any gasoline, #1 diesel, and #2 diesel fuel applications. One tube of FUEL POWDER treats up to 7 gallons of fuel. Specially formulated Clean Boost FUEL POWDER removes deposits which cause incomplete burn in the combustion chamber which leaves carbon deposits.

PRODUCT MARKETS:

FUEL POWDER is manufactured for the gas powered engine market and will work on small motors to large diesel power plants. Works on outboard motors, small watercraft, small engines, heavy equipment, yachts, large vehicles and any other device that uses a gas powered engine.

PRODUCT SPECIFICATIONS:

Part Numbers:

1104F 1 Packet = 4 treatments

Test Results/Supported Data:

Registered with the EPA. ASTM tests and SAE tests have been conducted to support FUEL POWDER.

FUEL POWDER – AT A GLANCE

- Improves Fuel Mileage
- Reduces Emissions
- Burns fuel more completely so your engine stays cleaner
- Prevents damaging build-up caused by unburnt fuel or recirculated contaminants
- Saves money, You'll lose money every time you don't put Clean Boost in your tank
- More Horse-Power
